

EXPERIENCE

Mycelium Networks – *Head of Ecosystem* – **May 2021 – Present**

- Mycelium is an incubator and accelerator of decentralized physical infrastructure networks (DePINs)
- My role includes activities relating to strategic partnerships, due diligence, research and analysis, development of internal tooling and fundraising
- I oversaw the launch of the Mycelium Testbed, the world's premier DePIN incubator. The Testbed's physical footprint spans 1600+ SqMi of ubiquitous DePIN coverage
- Member inaugural cohort of the Bounds Accelerator, backed by Coinbase Ventures and Haun Ventures.

Unleashing DePIN – *Head of Growth* – **Jan 2023 – Present**

- Maintained a pipeline of well established DePIN founders and helped to coordinate partnerships and content strategies.
- Direct oversight of business development, onboarding, partnerships and product management under the Unleashing DePIN brand.

EDUCATION

University of Arkansas – *Information Systems B.S.B.A with Blockchain Enterprise Systems Concentration* – **Fall 2019 – MAY 2023**

- Independent Study involving operation of blockchain nodes on IBM z16 Mainframe architecture
- Developed CHRG, a *decentralized EV charging protocol* – *2nd place in Razorblock Blockchain Hackathon*
- Founder, UARK Crypto Club
- Contributor, OZDAO

VOLUNTEERING

IoTeX DePIN Surf Accelerator – *Mentor*

- Developed informational content surrounding the design and development of DePIN Hardware for reference by cohort companies.
- Contributed to “Decentralized Physical Infrastructure Networks: A Modular Infrastructure Thesis” report alongside DePIN community and IoTeX team members.

PROJECTS

Total Eclipse Hackathon – *Community Award Winner*

- Awarded the Total Eclipse Challenge Community Award for Eclipse XRAY – an Eclipse native block explorer powered by public RPCs.
