

Dear Hiring Manager,

I am excited to express my interest in opportunities within your organization. With a proven track record in blockchain infrastructure, decentralized systems, and ecosystem growth, I bring a unique combination of technical expertise, strategic insight, and leadership skills that can help accelerate growth and success in a variety of roles.

At [Mycelium Networks](#), I served as **Head of Ecosystem**, where I oversaw the launch of the [Mycelium Testbed](#), a 1600-square-mile region acting as an incubator and accelerator for decentralized physical infrastructure networks projects, providing a home for DePIN projects to test and deploy their hardware and solutions at scale. I also led ecosystem partnerships with industry leaders such as Helium, IoTeX, and Eclipse, alongside emerging projects like XNET and Wayru, facilitating large scale deployments in the Testbed. In addition, I spearheaded research efforts, managing a comprehensive database of decentralized infrastructure projects, conducting due diligence, and assessing new opportunities. To streamline these processes, I developed an automated backend system to collect and process data from both on-chain and off-chain sources. I also built, deployed, and maintained a fleet of bare-metal servers used for a variety of protocols and networks.

At [Unleashing DePIN](#), as **Head of Growth**, I curated a pipeline of DePIN industry projects and founders, helping to highlight key innovators and emerging ventures. I conducted due diligence on the projects we featured, ensuring that we provided valuable insights. Additionally, I built [DePIN Pulse](#), an aggregator that showcases DePIN earning opportunities, including yields and ROIs across liquidity pools, staking, hardware and compute, creating a key resource for analyzing DePIN protocols.

I am passionate about helping projects and teams navigate complex technical and strategic challenges. Whether through identifying new growth opportunities, building and maintaining partnerships, or developing technical solutions, I thrive in environments that prioritize innovation, independence, and collaboration. My diverse experience across blockchain infrastructure, decentralized systems, and ecosystem growth allows me to adapt and contribute value to a wide range of roles and job functions.

I would love the opportunity to discuss how my experience and skills can contribute to the success of your organization. Thank you for considering my application.

Best regards,

Nick Carpinito
